DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Regarding claim 7, it is unclear from the preamble as to whether a singular fishing lure or a plurality of fishing lures are being claimed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3644

6. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tallerico, US Patent 5,327,670.

Tallerico discloses a lure module comprising a proximal end having a tie eye (30), a distal end having a snap swivel (32) and lure means there between (as seen in Figure 1), wherein the tie eye can be affixed to a fishing line and the snap swivel can be attached to a hook. However, Tallerico does not disclose a plurality of lure module elements. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have a plurality of lure module elements, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 13 USPQ 8.

Regarding claim 4, Tallerico discloses a wire separating the proximal and distal ends.

Regarding claims 2, 5 and 6, Tallerico discloses the lure means being selected from the group of functional elements for creating a game fish attraction through sight, smell, sound and vibration.

Regarding claims 3, Tallerico discloses the functional elements are selected from the claimed group.

Regarding claims 7-10, while not positively stated Tallerico inherently discloses through the use of the apparatus the method of selection of interchangeable elements, attachment of interchangeable elements to a fishing line, selection of a hook and the attachment of the hook.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

Art Unit: 3644

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of copending Application No. 10/060478. Although the conflicting claims are not identical, they are not patentably distinct from each other because each of the claims are directed to a lure comprising spoons, blades, beads, clevis, swivels, etc. While the current application contains claims directed to the elements creating attraction via the use of sound, sight, smell or vibration which were not claimed in the '478 patent, it is nonetheless considered obvious as a lure must function to attract via sight, sound, smell or vibration.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnson, US 5,634,290 and Mihaljevic, US 4,142,319.
